Instructions for use of OCAD6

How to use OCAD6 and edit the map

1. Open OCAD6 directly from the installed location
2. Select file-open-then select the OCAD6 copy of your map
3. This will open an electronic copy of your map
4. To remove grid lines select the grid icon on the top right of your screen
5. To create controls and make a course – select the red circle icon on the right hand menu
6. Once selected click map to place. Repeat this for all icons including numbers
7. You can make extra maps to go with lesson plans using this software
8. More information or help can be found at: http://www.ocad.com/en/index.htm
